Daily overview

What happened, what matters today and what needs monitoring. Priority and confidence are set by rule from the event records, explained on the last page.

The International Court of Justice ruled that Myanmar committed genocide against the Rohingya, prompting the UK to expel a Myanmar military diplomat.

The ICJ found Myanmar responsible for genocide against the Rohingya during the 2017 military crackdown, ordering reparations and the safe return of refugees (Events 5, 19). The UK responded by expelling a Myanmar military diplomat (Events 13, 14). Meanwhile, the junta is reviewing its relations with ASEAN and rejecting Chinese proposals to reopen border trade routes (Events 8, 11, 31).

Intelligence assessment and watchlist

Implications, uncertainties and what to monitor in the next 24-72 hours.

The ICJ ruling provides a legal foundation for international accountability and reparations, though enforcement remains uncertain. Separately, in the same days, the junta announced a review of its ASEAN relations and rejected China's proposals to reopen border trade routes; the sources do not link these to the ruling. Immediate uncertainties include the scale of the UK's diplomatic response and whether the junta will comply with the court's orders.

Key information gaps

- The death toll at the Shwe Min Wan pagoda attack is disputed: Kyaukse District Battalion 1 officials said 9 died, while an eyewitness account lists 6 dead and 5 injured (Event 9).

Watchlist

1	Further diplomatic expulsions or UN Security Council actions following the ICJ ruling (Events 14, 20).
2	Changes in border trade volumes or official status of the 14 closed border towns (Events 11, 31).
3	The implementation of coordinated operations in Chin State by CPU/CPA and CDF (Event 7).
4	The impact of kyat depreciation on the price of Thai consumer goods (Event 23).

Sources and method

116 analysed reports collected in the window (18 Nov 23:45 - 19 Nov 2026 23:45 Myanmar time), grouped into 70 events with the weekly report's clustering; 7 were carried by two or more independent outlets. Event numbers missing from the cards were merged into another event or dropped by the review. Priority: P1 critical = 10 or more reported killed, a change of control reported by two or more outlets, a major political development reported by two or more outlets, or 5,000 or more displaced. P2 high = fighting with deaths, airstrikes, harm to civilians, a claimed change of control, displacement, or a significant diplomatic, economic or political development. P3 monitoring = other reports. Confidence: HIGH = three or more independent outlets, MODERATE = two, LOW = one; when every report of an event relays one party's account (state media, say), it counts as one source. A single source is MODERATE when an outlet behind it is rated High or better (4.0+) for reliability in the platform's source register, since one outlet reporting alone may simply have a source others lack. Figures are as reported; the platform does not verify claims independently. Headline, assessment and watchlist are written by the platform's language model from these events only. Most outlets are exile or resistance-aligned media.
